PROJECTS

Recipe Box (06/2017) [↗](#)

- App intended to be used as a recipe notebook where you can save and edit ingredients and instructions for the recipes you like the most. Take advantage of browser LocalStorage to persist user's data for future reference. Coded using React, Bootstrap and Toastr to display notifications or errors.

Hacker News Client (05/2017) [↗](#)

- Web application for searching any topic on Hacker News board and sorting the results for better viewing. Make use of Hacker News API to show query results with related post information. Implemented ES6 features like Classes, spread operators, arrow functions, template literals, Fetch API, among others. Made with React, transpiled to ES5 with Babel and tested using Jest and Enzyme.

Chingu Cohorts (09/2016 – Present)

- Chingu Cohorts are a community-powered online coding bootcamp generator. I have been actively participating since its foundation.
- I've been part of past and on-going open source and Chingu-related projects.
- Participate on pair-programming and code review sessions.
- Help other members to solve bugs and problems or level-up their knowledge.

WORK EXPERIENCE

IT Consultant / Developer

Self- Employed

03/2016 – 03/2017

Argentina

- Help local companies and businesses acquire and implement modern technologies, both hardware and software, in order to keep up to date.
- Explain modern methods and tools to business allowing them to improve their productivity and workflow.
- Develop apps and tools to fulfill companies needs or replace old implementations.

Professional Poker Player

Online

04/2010 – 12/2015

- During my poker career I incorporated valuable skills like self-discipline and self-determination that allowed me to maintain learning and self-improvement habits on a daily basis.
- Worked everyday using math tools such as statistics, probability and game theory in addition to the use of SQL databases (PostgreSQL).

EDUCATION
